I just finished reading it. Ask your library!

"Gifted Children - A guide for Parents and Professionals" edited by Kate Distin.
(ISBN-13:978-1-84310-439-1)

Chapter headings include

What is normal for a Gifted Child? (with an acknowledgement that there is almost no such thing, but there are some typical patterns)

Giftedness and Schools

Gifted Adolescents

Musically Gifted Children

Beyond the Family

Living with Giftedness

This was a great overview of all the social, emotional, intellectual issues that seem to so often come with giftedness. Not just the kids issues, but also the parents issues (what DO you say when Johnny's mom complains the work is too hard for him, but your little Susie is bored? Does having a gifted child raise issues for you about your own education, possibly overlooked giftedness, etc?).
